

MONUMENTIQUE CLEANING PASTE C

Neutral cleaning paste for monument surfaces

- Does not damage marble, sandstone, or sand-lime brick
- Not necessary to spray with water because of the (peelable) film
- Biodegradable
- Ideal for monumental objects, such as churches and statues

MONUMENTIQUE CLEANING PASTE C

DESCRIPTION

A cleaning paste based on the disodium salt from EDTA hydrate (Ethylene Diamine Tetra-Acetic acid) for cleaning sensitive surfaces (e.g. sensitive to acids and alkalis), such as marble, sandstone, and sand-lime brick.

RECOMMENDED USE

Monumentique Cleaning Paste C is suitable as a cleaner for (acid and alkali) sensitive surfaces, such as marble, sandstone, and limestone.
These materials are often used for monuments and ornaments.
The product is also suitable because it forms a film, which prevents it from being sprayed off with water.

PRACTICAL CONSUMPTION

The consumption of the product is heavily dependent on the degree of contamination and the type of surface.

DIRECTIONS FOR USE

Apply the paste at least 2 to 3 mm thick on the surface to be cleaned and cover the paste with PVC film to prevent it from drying out too quickly.
The paste must be allowed to soak in for 24 to 48 hours depending on the temperature and the humidity. After drying, remove the paste as an elastic film.
Clean the surface afterwards with a steam cleaner at a suitable pressure.

APPLICATION CONDITIONS

Minimum ambient temperature : 5 °C
Maximum relative humidity : 100%
Minimum surface temperature : 5 °C
Maximum surface temperature: 35 °C

CLEANING OF EQUIPMENT / SPILLS

Rinse with clean water immediately after use.

PH

7,50

SHELF LIFE

Can be kept for a minimum of 12 months when stored in a dry, cool, and frost-free environment in the original unopened packaging.

Date issued: 05/02/2025
