

## MURODEX BIO

# Environmentally friendly, effective façade cleaner

- Powerful dirt dissolver without acids or solvents
- Environment and user-friendly
- Also works at lower temperatures
- For concrete, masonry, washable gravel grids, and mineral decorative plasters
- Economical to use

# MURODEX BIO

## BESKRIVELSE

A water-based façade cleaner based on special bacteria and enzyme cultures for environmentally friendly and acid-free and alkaline-free cleaning of mineral construction materials.

## ANBEFALET BRUG

Murodex Bio is a special cleaner for mineral construction materials, such as building brick, concrete, natural stone, washed gravel plates, and cement-based stucco layers, and is very suitable for cleaning mineral stucco layers in façade insulation systems.

## BRUGSANVISNING

Dilute Murodex Bio with water maximally to a ratio of 1:3 depending on the degree of fouling.

Apply and saturate with Murodex Bio using the plastic pressurised sprayer, a square brush, or hand brush.

Wipe the chosen surface with a hard brush.

Allow all of it to soak in for at least 48 hours.

After the soak in period, spray off with a high-pressure cleaner.

Before use, we recommend trying out a test surface to help determine consumption and efficacy on a specific surface and determine fouling.

## ANVENDELSESBETINGELSER

Minimum ambient temperature : 10 °C

Maximum relative humidity : 100%

Minimum surface temperature : 10 °C

Maximum surface temperature: 35 °C

## RENGØRING AF UDSTYR/SPILD

Rinse with clean water immediately after use.

## BEMÆRKninger

Dispose of remnants of the product and empty packaging as chemical waste in accordance with the local regulations and legal requirements.

## PH

7

## HOLDBARHED

Can be kept for a minimum of 12 months when stored in a dry, cool, and frost-free environment in the original unopened packaging.
